Student Council GSSM
Youth in government
Competitive programming club president
Summer research GSSM
internships
National Merit Semi Finalist

skills

-spatial visualization

- My vocabulary makes it easy for me to communicate effectively with people from different backgrounds and with different interests and levels of knowledge.

I'm automatically aware of trends or patterns in numerical data. • I'll excel in classes like statistics, finance, or business analytics. • I can spot and project trends in numbers, I am natural for building strategies for the future based on the past. • Give me a numerical puzzle to solve or a code to crack, and I'm in my element.

I like any job that moves quickly from project to project or demands new ideas all the time.

S-Sequential reasoning - • I'm good at refining existing plans and processes, but I prefer not to create them from scratch.
